

Clifton Taulbert's Keynote Talks & Engaging Workshops:

ACCELERATE YOUR IMAGINATION: IMAGINE WHAT ISN'T

Clifton Taulbert's engaging and thoughtful conversation embraced by corporate America and many of their international counterparts now a conversation for Community Colleges; **ACCELERATE YOUR IMAGINATION**. This talk was specifically designed for Ericsson—headquartered in Kista, Sweden as they challenged Taulbert to engage their North American Suppliers in understanding that the Technology

Revolution has recalibrated expectations at all levels and among most businesses, Ericsson notwithstanding. New thought and fresh ideas would guide their future: thus the need to clearly understand their next steps. Taulbert has found this need to **"clearly understand next steps"** to be of significant value in any organization. Plan to use past successes as launching pads to the future, to anticipate and plan for those next steps. Taulbert's initial Ericsson conversation has become his "Act Now" MESSAGE to academic

organizations around the globe.

The signals are strong, if your institution is to compete and remain relevant, then your choice is very clear, **ACCELERATE YOUR IMAGINATION**. According to Taulbert, this call to action encompasses the boardroom and the campus security guard—all hands are needed, with all minds engaged--ACCELERATED.

"We must be intentional about taking the top of the Mason Jar (a glass jar commonly used in the South to preserve and keep everything else out) where we may have metaphorically preserved our professional efforts from yesterday and allow the "Reality of Change" to upset, modify and broaden our perspective of what the future can be," say Taulbert.

Taulbert grew up on the Mississippi Delta during challenging times and knows first-hand the impact of his imagination-to imagine what didn't exist.

"Knowledge is what we know. Our Imagination is what we have yet to discover."

To arrange your conversation with this noted entrepreneur, author and human capital consultant, call his office and arrange for a visit that could give your LEADERSHIP TEAM the launch imagined.
